

ELC – 1 Falcon Cisco Switch Upgrade Complete

Anna Senties

On Friday, February 10, 2017, **Anna Senties** upgraded the switching infrastructure at the Early Learning Center at Falcon (ELC-1). **Anna** worked with Gigabit Technologies and Presidio to install the new Cisco switches required for the site's network connectivity.

The majority of the administrative sites are located in **Anna's** quadrant. **Anna** has been working hard to upgrade these sites with only one administrative site remaining to convert.
