## Orders Replacement Network Printers

Kim Bowlin leader of the Acquisition team as ordered network replacement printers to be installed at campuses this summer.

The Service Center team will start with zone 4 and will complete as many campuses as they can. The Service Center team is meeting with the campuses to explain the process for the installation of the network printers.

Campus Level	Large Color Printer	Large Black & White Printer	Medium Color Printer	Small Black & White Printer
Elementary	1	13	1	32
Middle School	1	26	1	60
High School	1	52	1	120

Shown in this chart, is the guide, we will be using to determine how many of each of the printers a school will receive. This may mean that some school could get more printers or less printers than other schools. We think that replacing the network printer with this process will result in toner cost saving for the District. The Service Center team has already completed this process at four schools.
