

Plans to Initiate Switch Conversions At Administrative Sites

Goal 2

Elizabeth Montes and **Anthony Melton** pictured with the Director of Telge Transportation Center

Since the Enterprise Communications and Network Team (ECN) has completed the networking switch upgrade at all high school, middle school and elementary campuses, the team is initiating the Cisco switch upgrade at administrative sites.

Elizabeth Montes and **Anthony Melton** met with the Director of Telge Transportation on **November 10, 2016**. The Transportation department agreed that the week of Thanksgiving break is a good time to plan the upgrade. The current plan is as follows:

11/21/2016 – 7am	Telge Transportation
12pm	Eldridge Transportation

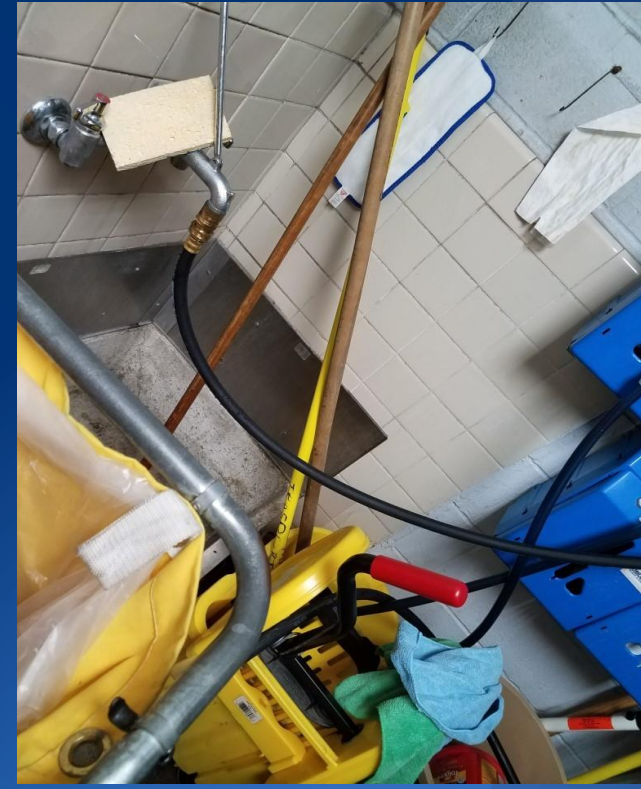

11/22/2016 – 7am	Falcon Transportation
12pm	Barker Transportation

Each transportation center also has an early learning center that is network attached. The ECN team is doing the necessary preliminary work required before the centers can be upgraded.

Goal 2

Plans to Initiate Switch Conversions At Administrative Sites

Anna Senties is working with **Elizabeth Montes** to prepare the Transportation Centers for the Cisco switch conversion. The pictures above are of the custodial closet that also doubles as a network closet at Falcon Transportation. **Anna** was hoping to relocate the network closet, but due to time constraints, the move will have to take place at a later date.

Bond Goal 2.3 Install Network Infrastructure Electronics – Administrative Sites
