

Goal 2

Enterprise Communications Network Portable Switch Upgrade Pilot

David Deitsch

Elizabeth Montes

David Deitsch

English teacher – Ms. Stevens

The campus Cisco switch upgrade project that began June 2015 and ended April 2016, upgraded the switches in the MDF/IDF closets at every campus. The upgrade did not include connectivity to portable buildings. Presidio and the ECN team worked together to select a smaller, quieter Cisco 3560CX switch that could be used for the portables. As a pilot project, **Elizabeth Montes** worked with David Deitsch from Presidio to deploy the first Cisco 3560-CX switches at the Cy Fair HS portables. As a result, the portables have an increased connection of 1 GB.
