

# DEVICE IMAGING AND INTEGRATION

## DII In Action

**Derly Buentello** is in the process of working on a POC for MBAM (Microsoft BitLocker Administration and Monitoring), which will allow hard drives and USB drives to be encrypted with BitLocker. The encryption process is important due to important student and district data on hard drives.

The POC started with Instructional Technology Services. After success was seen there, **Derly** is now moving to Psychological Services and then Speech Pathologists and Diagnosticians.

proof of concept

**Anthony Melton** is in the process of performing a POC of the cloud-based McAfee antivirus solution. The proof of concept is taking place in a lab at Jersey Village. McAfee is one of the products being considered for replacement of Kaspersky. In the meantime, the district will utilize Windows Defender following the removal of Kaspersky.
