

DEVICE IMAGING AND INTEGRATION TECHNICIAN MEETINGS

Both **Austen Chang** and **Michelle Campos** presented at the last Technician meeting.

Michelle went over the new DII-SMART, a tool that will allow Technicians to see what should be in LANDESK Workspaces for each Image Code. This tool is something requested by Technicians that has never been available before and we are very excited about it.

Austen showed Technicians how to update Certiport Console 8 so that students can successfully take their certification tests for Microsoft and Adobe products.

A PEARSON VUE BUSINESS

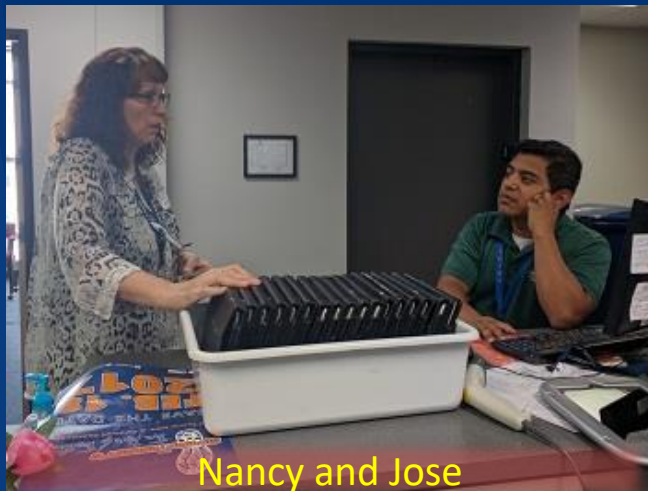

DEVICE IMAGING AND INTEGRATION TABLETS

Nancy Grella and **Larry Barrios** (not pictured) had a conference call with ESL and Imagine Learning. ESL is doing a POC (proof of concept) of the Imagine Learning app at Wilson and Willbern. **Nancy** and **Larry** were on the call so that Technology Services could ask and answer questions in order to make the POC as successful as possible.

Conferencing Nancy

Nancy and Jose

Jose Mendez delivered iPads to **Nancy Grella** from Wilson Elementary. These were the first iPads used in the district in a POC called “The Pilot Project” four years ago. Nancy is reimaging them so that they can continue to be used by the school.

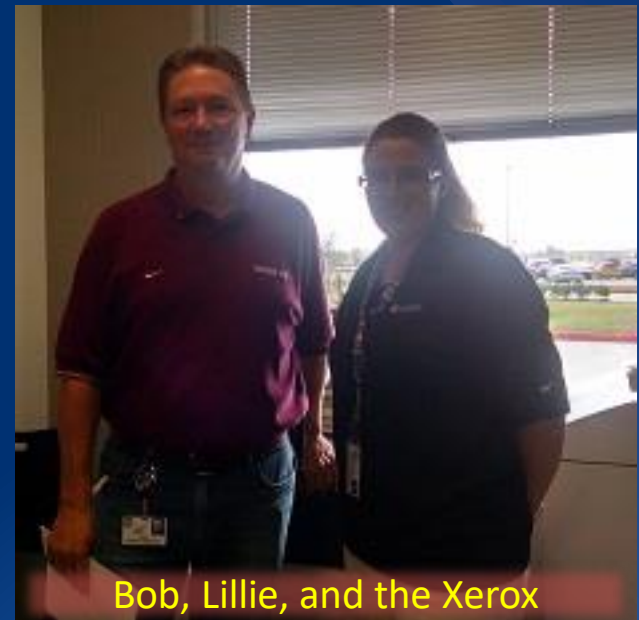

DEVICE IMAGING AND INTEGRATION SCANIT – SECOND ROUND

After the new ScanIt-approved Fujitsu scanner was installed at CyPark last week, it quickly became apparent that it still did not work correctly with the software. During many scans, the bartag at the top of the scan sheet would not recognize. This was an intermittent problem and teachers were having to scan up to 15 times to get all tests scored.

Lillie Swearingen visited CyPark to troubleshoot and had the same issue, regardless of printer used to print the ScanIt test sheets. After much troubleshooting, it was decided the Fujitsu scanner was not going to work correctly.

Luckily, there is a Xerox copier/scanner available in the Teacher Workroom. **Bob Rader** and **Lillie** configured ScanIt to scan correctly from the Xerox. A big thanks to **Bob** for finding the correct setting for remote scanning! **Bob** will set up the rest of the ScanIt computers to scan from this Xerox.

DEVICE IMAGING AND INTEGRATION

CFISD LANDESK SYSTRAY TOOL

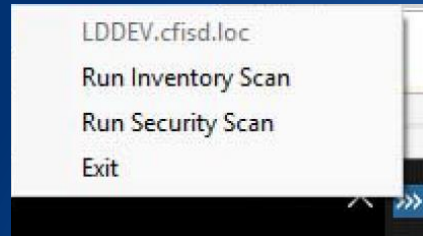

A new tool has been made available in the System Tray of computers and will come down with the next computer Security Scan (runs randomly once a day). **Josh Zhang** created this tool and we believe it will be very useful for Technicians.

The CFISD LANDESK Systray Tool helps identify which LANDESK server a computer is connected to and also shows the last time an Inventory Scan and Security Scan has been run on a computer.

Double clicking the system tray icon will pop up a message showing the following information:

Right clicking the system tray icon will pull up a menu showing LANDESK server and allow the user to manually run an Inventory Scan or Security Scan.

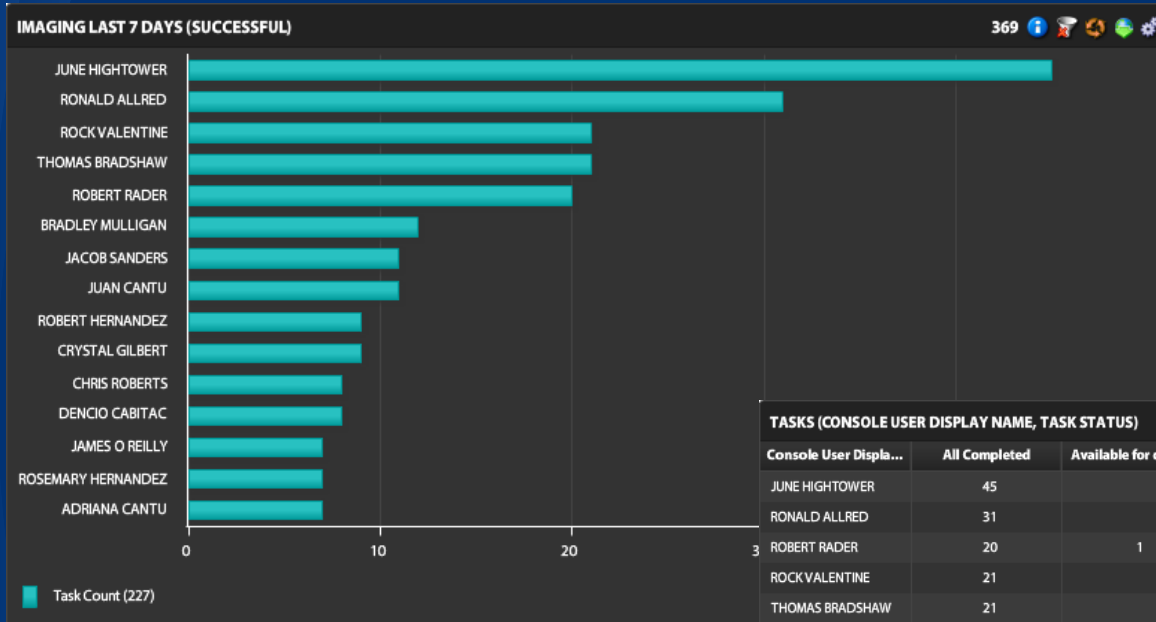

If the automatically triggered scans are running in the background CFLST will indicate that a scan is currently running even though the user interface for the scan is not visible.

In Windows 7, the pop up message appears in the form of a message box while in Windows 10 it will appear in the Notification Center.

DEVICE IMAGING AND INTEGRATION XTRACTION IMAGING REPORTS

This week, **Josh Zhang** set up the XTRACTION reporting tool to pull Imaging reports to verify the imaging process is performing as expected. Below, you can see the results from the past week:

To the left is the number of successful imaging processes over the last 7 days. **June Hightower**, you must be imaging labs!

Console User Displa...	All Completed	Available for downl...	Failed, non-complet...	Failed See NT Event ...	Working	TOTAL
JUNE HIGHTOWER	45			2		47
RONALD ALLRED	31					31
ROBERT RADER	20	1	1			22
ROCK VALENTINE	21					21
THOMAS BRADSHAW	21					21
BRADLEY MULLIGAN	12	1				13
JAMES O REILLY	7	4			1	12
GENE GARRETT	7	4	1			12
JACOB SANDERS	11					11
JUAN CANTU	11					11
ROBERT HERNANDEZ	9					9
DENCIO CABITAC	8	1				9
CHRIS ROBERTS	8	1				9
CRYSTAL GILBERT	9					9
ADRIANA CANTU	7			1		8
STEPHEN HERNANDEZ	7					7
HOLLY KOSTERS	6	1				7
ROSEMARY HERNANDEZ	7					7

To the right, you can see the number of failed imaging processes. As you can see, the number of failed versus successful is very low.

DEVICE IMAGING AND INTEGRATION LANDESK PACKAGES

The following LANDESK Workspaces packages were created or updated this week:

- SchoolNet Secure Tester – released
- LANDESK Systray Tool – released
- ExamView HS Social Studies – released
- Adobe Photoshop Elements 14
- Adobe Premiere Elements 14
- Adobe Presenter 10 (Windows 7 only, not updated but not compatible with Windows 10)
- Adobe Presenter 11 (Windows 10 only)
- Full Adobe CC 2015 Suite:
- *Adobe After Effects CC 2015.3
- *Adobe Animate CC 2015.2
- *Adobe Audition CC 2015.2
- *Adobe Bridge CC 2015 Release 6.3.1.186
- *Adobe Dreamweaver CC 2015.3
- *Adobe EdgeAnimate CC 2015 (Not updated, Adobe Animate CC 2015.2 is the replacement. EdgeAnimate will still stay as an option).
- *Adobe ExtendScript Toolkit CC 2015
- *Adobe Extension Manager CC 2015 v7.3.2.39
- *Adobe Fireworks CS6 v12.0.1.273
- *Adobe Flash Builder 4.7 Premium
- *Adobe Flash Pro CC 2015
- *Adobe Illustrator CC 2015.3.1
- *Adobe InCopy CC 2015 v11.4.0.90
- *Adobe InDesign CC 2015 v11.4.1.102
- *Adobe Lightroom CC 2015.7
- *Adobe Media Encoder CC 2015.4
- *Adobe Muse CC 2015.2
- *Adobe Photoshop CC 2015.5
- *Adobe Prelude CC 2015.4.1
- *Adobe Premiere Pro CC 2015.4
- *Adobe Scout CC v1.1.3.354121
- *Adobe SpeedGrade CC 2015

The following packages have been added to image Provisioning for Teacher computers:

- *Hovercam Flex 10
- *ActivInspire
