

DEVICE IMAGING AND INTEGRATION

APPLE UPDATES

Apple Rep, **Dina McHearn**, and Apple Engineer, **Alby Rose**, shared information about new and exciting features that are coming available with the 9.3 iOS release specific to education and shared iPads. The new features include options for 'Shared iPads', managed Apple Ids for Education, Classroom and a single Apple Portal to manage all Apple accounts.

One of the new features is Classroom – a new app for teachers to direct students attention when using iPads

AWESOME JOB!!

DEVICE IMAGING AND INTEGRATION LANDESK IMAGING

DII continues to visit Elementary campuses to make them aware of the LANDESK conversion and imaging student laptops.

Sometimes you just need a good laugh...

Michelle Campos with Anthony Melton
at Bane ES

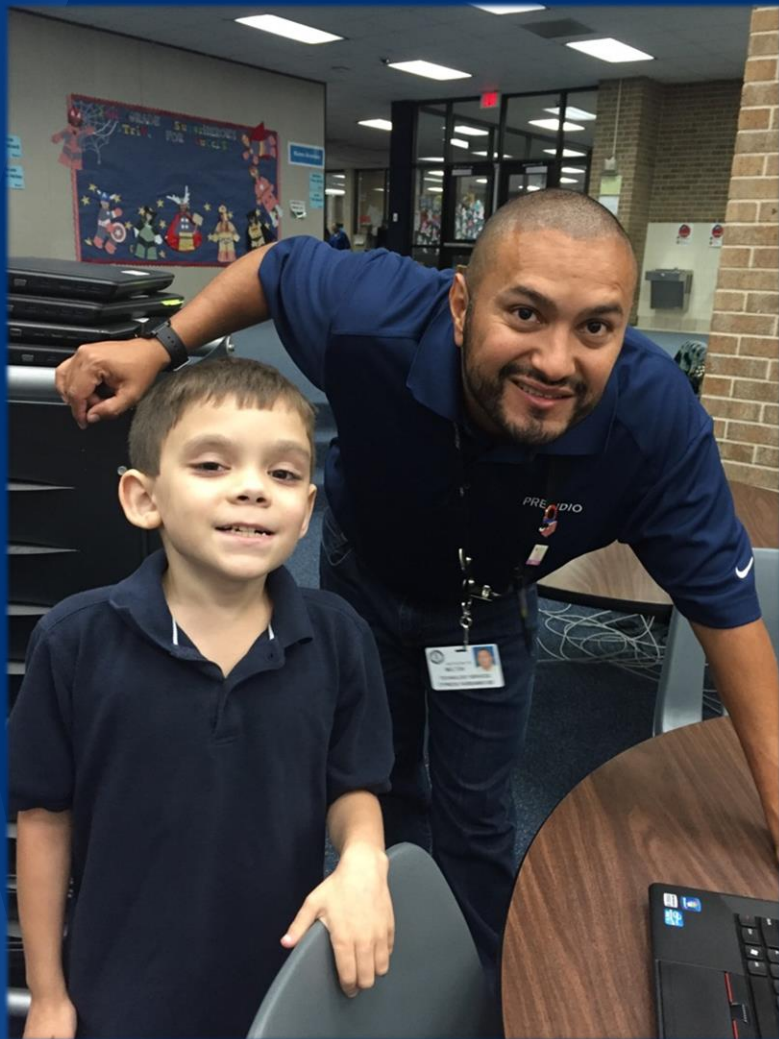

If you can laugh, then you can work hard...

Prime technicians: Cenya, Keli, and Bradley with
Austen at Holbrook ES

DEVICE IMAGING AND INTEGRATION LANDESK IMAGING

A second grade student named Chris at Bane elementary has been telling his teacher how the school needs Windows 10. When DII was at Bane, Chris went to visit [Anthony Melton](#) while he was reimaging the student laptops. Chris loves computers and is so excited to be getting Windows 10 on them. We was happy Bane was getting Windows 10

DEVICE IMAGING AND INTEGRATION WATKINS CONSTRUCTION MEETING

Larry Barrios and Michelle Campos along with the ECN and AAS departments attended a facilities meeting to discuss the up coming summer construction at Watkins MS. This meeting help to establish who will be responsible for securing and moving the network, phones and desktops equipment at the campus.

The Watkins construction will take a full year to complete. This requires all these teams to work together to help get the portable village established and ready for the students and faculty to use during the next school year.
