

DEVICE IMAGING AND INTEGRATION PACKAGE UNINSTALLS

Nancy Grella spent part of the week on uninstallation packages when she was not busy troubleshooting tablets. Below is a chart showing the completion status of uninstallation packages.

	Total Number	Total Number Complete	Percentage Complete
Cosmetology	6	6	100.0%
Music	3	0	0.0%
Social Studies	4	4	100.0%
Standard Apps	33	1	3.0%
Testing	3	2	66.7%
Admin	36	15	41.7%
Adobe	31	11	35.5%
CTE Business	63	1	1.6%
Elem	25	25	100.0%
Fixes & Peripherals	8	2	25.0%
Foreign Language	2	2	100.0%
Literature Reading English	15	15	100.0%
Math	26	25	96.2%
Science	23	16	69.6%
SPED	36	22	61.1%
Various	9	2	22.2%
Totals	323	149	46.1%

DEVICE IMAGING AND INTEGRATION CFISD LIVESTOCK SHOW 2017

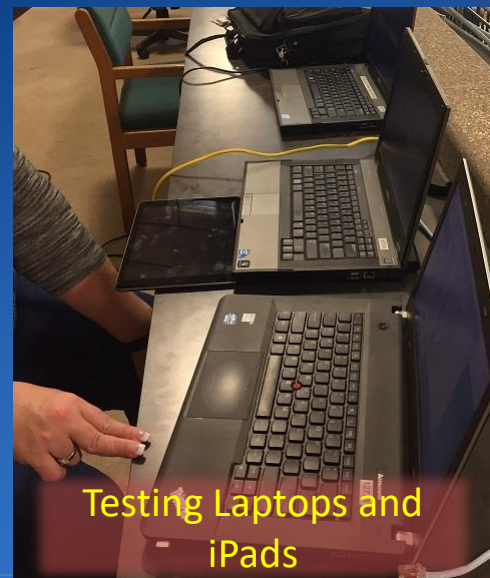

Anthony and Denise

Anthony Melton and Michelle Campos performed a trial run on laptops using the new Aruba wireless system at the Cypress Fairbanks ISD Exhibit Center to verify everything is ready and working for the upcoming CFISD 2017 Livestock Show. Denise Kubecka, coordinator for Career And Technical Education (CATE) was on site as well.

It's necessary for the program Sho Works 2016 to work on laptops and iPads. Both setups were tested. There will be additional testing performed next week once the permanent locations for the Livestock show are chosen.

Don't forget to come visit the CFISD 2017 Livestock Show on February 2nd - 4th! Bring the family!

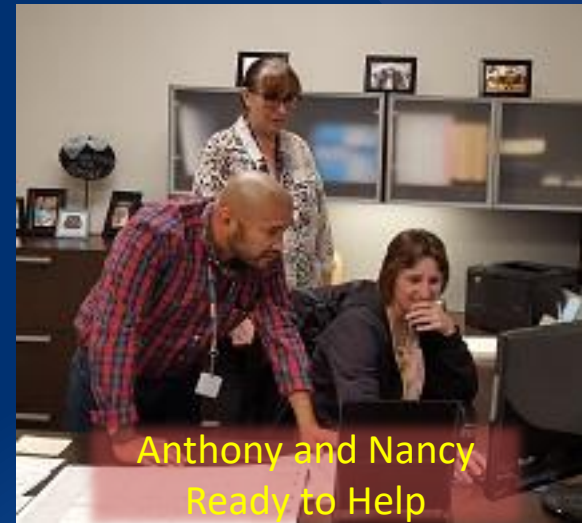

Testing Laptops and iPads

DEVICE IMAGING AND INTEGRATION WESTGREEN TRANSPORTATION

Anthony Melton, Nancy Grella, and Michelle Campos travelled to the Westgreen Transportation Center this week to install network printers, software, and other peripherals as the new transportation center is being staffed.

They also met up with Robin McKinney, former CCC associate. She now works with and services Xerox WorkCenters in new installations. She just happened to be onsite for support while the DII Team Members were there.

DEVICE IMAGING AND INTEGRATION WEBINARS

Michelle Campos attended a day-long webinar on how to use the LANDESK Software Monitor Licensing piece. She will utilize this tool to view reports on software that is out of compliance. It can also be used to see who is not actively using software so that software licenses can be redistributed to customers who have more of a need for the software.

Derly and Lillie

Michelle Webinaring

Derly Buentello, **Lillie Swearingen**, and **Larry Barrios** attended a webinar on TestNav usage and technical coordination. **Derly** will be taking over testing coordination from **NMO's Lance Melancon** with **Lillie** as backup support. **Lance** will be available during the first few testing sessions as a resource. **DII** is excited about the opportunity to take on this new task.
