

DEVICE IMAGING AND INTEGRATION

DII In Meetings

Lillie and Michelle

Lillie Swearingen, Michelle Campos, and Larry Barrios (not pictured) had a WebEx / Conference Call with Adobe regarding the license change coming in November. This alteration in the license will require all Adobe packages to be rebuilt, as well as a license fix to be pushed out to existing installations.

T-Mobile Reps

Becky Cook met with T-Mobile to discuss devices that would provide Internet Access to students from home. Paula Ross, Larry Barrios, and Greg Rhodes were also in attendance. T-Mobile provided a device for the team to test.

Nancy and Derly

Nancy Grella and Derly Buentello had a conference call with Airwatch regarding an upgrade from version 8.2.3 to 9.2. This upgrade requires meetings with the Airwatch support team to perform a “current environment discovery”. Servers will also need to be upgraded, which will be handled by Nelda Hanzi (NMO).
