Spring Break '16

While the majority of the CFISD staff had the week of Spring Break off, many members of the ECN team decided to take advantage of the flexible schedule and complete several miscellaneous tasks.

Thomas Hollister and **Glen Carpenter** worked with David Deitsch from Presidio to complete the following tasks at Campbell MS:

- The module providing extra ports in the 4500 was removed from Anthony MS and swapped with the blank off plate at Campbell
- Closet H stack 80 was separated into stacks 80 and 82 and connected to the 4500
- Closet I stack 90 was separated into stacks 90 and 92 and connected back to the 4500
- Configuration files were written for the 2 new stacks
- The ports on the 4500 were re-arranged to move the portables to the last part as has become the standard, the hub connection was brought up in port T1/2, and the closet connections were accommodated in the correct order
- The 4500 was reconfigured to accommodate all of the these changes correctly

Additional miscellaneous tasks performed throughout the district during spring break:

Monday, March 14, 2016, **Glen Carpenter** reset the GFI breaker for Moore ES IDF-C closet, so David Deitsch from Presidio could upgrade the router IOS.

Tony Rogers stepped up and handled a complete switch failure at ALC/ABC IDF-B closet, since Anna Senties was out for spring break.

Oscar Villar corrected a DHCP issue at Anthony MS which affected BYOT and Visitor wireless access.

Tony Rogers also followed up for Elizabeth Montes on connectivity issues at the Cy Ridge HUB. Previously, David Deitsch from Presidio and Elizabeth Montes had connected the schools from the north side to the **Cy Ridge Hub**. However, there is something wrong with the Frame 3461. Therefore, **Tony** worked with Phonoscope to troubleshoot the connectivity issue.

Glen Carpenter worked with Phonoscope to identify and correct fiber labeling issues at various sites throughout the district.
