

Enterprise Communications Network Operational Activity

Oscar Villar

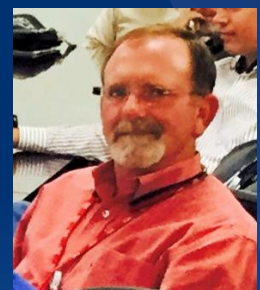

Oscar Villar worked with BlueCat support to confirm that with our DNS Start Of Authority being “cfisd.net”, an alias of cfisd.net can not be created to point to Cloudflare’s CFISD URL. Cloudflare support is used by the official CFISD website: www.cfisd.net.

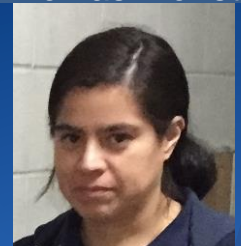

Roland Padilla

Elizabeth Montes, Anna Senties, and Thomas Hollister worked with Josh Zhang from the DII team to correct the IPv6 network issue. Josh pushed a new driver to the edge computers. The network connectivity was affected in several schools (Matzke, Moore, and Ault,... to name a few) due the traffic generated by a bad IPV6 driver on the edges devices. The problem was especially bad when the edge computers were in sleep mode or hibernating.

Roland Padilla worked tirelessly to organize the older Cisco and HP equipment that was removed from the high schools over the summer. Roland arranged for the remaining HP and Cisco equipment to be either purchased or recycled.
