

DEVICE IMAGING AND INTEGRATION

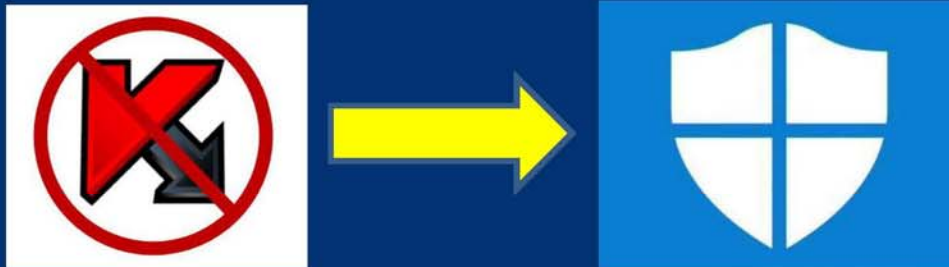

DII In Action

Lillie Swearingen assisted Nelda Hanzi (ISA) in moving Busfinder to a new VM. First, a snapshot was taken of the old VM by Kenneth Gibson (NMO) in case a rollback was necessary. Then Michael Diaz (NMO) did a VM-to-VM move of the server. Following that process, Transfinder technical support remotely accessed the server and configured the Busfinder software.

Nelda Hanzi

Lillie Swearingen and Austen Chang worked on a POC for the removal of Kaspersky and use of Windows Defender at Windfern HS and Falcon Transportation. After everything went smoothly, minus a couple of minor hiccups that were resolved quickly, we have moved into Phase 1 of district-wide Kaspersky removal. Salyards, Swenke, Keith, Ault, and Farney are now in the automatic Kaspersky removal process. The remainder of Zone 3 will be started after Thanksgiving break. Then, an aggressive schedule will be followed in order to remove Kaspersky from as many computers as possible before the beginning of 2018.
