

New Positions for 2016-2017 Approved and Job Descriptions Developed

Frankie Jackson worked with Paula Ross, Stuart Snow, and the Human Resources department to get two new senior positions that were approved in 2015, posted for 2016-2017. These positions include a security specialist and a voice and data cabling technician. This required verifying that the positions are still open and funding is allocated in the budget, and acquiring signatures so that jobs can be posted. Before the jobs could be posted, new job descriptions had to be developed. Frankie analyzed the job requirements and talked to other districts about positions like these. She then took the information and developed the new job descriptions. These were sent to Human Resources on **February 10, 2017**.

The positions are in the process of being posted. This is exciting news for our team!
