

# Visit to the Exhibit Center to Observe the Livestock Show and Auction

On Friday, **February 3, 2017**, Frankie Jackson visited the Exhibit Center to observe the livestock show using Aruba's enterprise wireless technology. Staff from the Device Imaging and Integration (DII) team and Enterprise Communication Networks (ECN) team, including MCA staff, install wireless with Bring Your Own Technology (BYOT). The scoring of the event and free access to visitors during the show worked flawlessly. More information about the team's work is [here](#). Thank you team!
