

Planning for the Tanner Mobile Home Park Wireless Access For Students Needing At Home Connectivity

Frankie Jackson worked with Dave Kapavik of Layer3 Communications, during the week to finalize plans for the implementation of wireless access for students living in the Tanner Mobile home park. These are students that need at home Internet connectivity. On Thursday, [April 19, 2018](#), a team of staff conducted a conference call with representatives from Layer3, and Frankie Jackson, Becky Cook, Larry Barrios, and Paula Ross. A lot of planning and activity has transpired. The following is the current plan for implementation.

- The utility pole will be installed at Tanner mobile home (MHP) park on April 26, 2018
- We have approval from Tanner MHP to install the pole
- The remaining wireless equipment order is set to arrive on April 30th
 - o This will provide Layer3 a chance to conduct testing of the wireless solution in their lab prior to deployment
 - o Layer3 is working to schedule a pre-implementation site visit at Cook this week
