

Meeting with Representatives From CareDox To Discuss Medical Records Interface

On Wednesday, [May 31, 2017](#) Frankie Jackson met with CareDox, Joe Palmiotto and Zach Harris, along with ISA staff, Rodney White and John Crumbley. Bevin Gordon, Director of Nursing for CFISD, is working with CareDox to build an automated interface between CareDox and eSchool, including immunizations. This would help save nurses time and reduce data entry. Frankie asked Joe to provide a preliminary design document to show how CareDox and eSchool would work together to build a stable, automated interface. Joe said he would.

Joe will be reaching out to Joel Hames, the Vice President of Product Management at PowerSchool eSchool, to discuss potential next steps for accelerating the data interface between eSchool and CareDox. Joe will also reach out to Rodney Wuite to initiate a test of immunization CSV loads.
