

Teamwork At Its Finest

Frankie Jackson spent most of the day on **June 1, 2018** walking around serving fresh blueberries with yogurt and ice cream to Technology Services staff. This was to show appreciation as well as to visit and observe staff working in their environment. The Network Management and Operations (NMO) team was monitoring the new virtual infrastructure. The Enterprise Communication Networks (ECN) team was monitoring the network. The Acquisitions team was getting end of the year purchase orders in. The Assets team was starting building and school renovation projects. The Information Services and Applications (ISA) teams were preparing for graduations and closing out school. The Business and Finance team was bringing Employee Access Center back on line. The list goes on and on. In every case, there was evidence of great teamwork.

The following pictures show staff from the Device Imaging and Integration (DII) team filling in at the Customer Care Center (CCC) so the CCC team could meet in their weekly meeting. ***It really was teamwork at its finest!***
