

# Working with Students from CyWoods High School for National Computer Science Contest – Govind Chada

Neetha Chada's son, Govind, a sophomore at CyWoods high school, is competing at the national level in a computer science contest. On **June 27, 2018**, Govind and his partner presented their project to Frankie Jackson and members of the Information Services and Applications (ISA) team.

Govind and his partner created a library checkout app. The app is designed to help librarians and students use library resources. Govind's team won at the state level and are advancing to the national level, competing at the University of Maryland during the weekend of July 1<sup>st</sup>, 2018.

We wish them luck! They have a fantastic presentation and software app.

**Govind may be the next Steve Jobs!**
