

Teacher Webpage Software Evaluation with Blackboard Software Systems

Frankie Jackson was invited to participate on a teacher webpage software evaluation. The evaluation team met with [Blackboard](#) on **January 23, 2018**. The Blackboard company representatives demonstrated their Blackboard Web Community Manager. It is a system that provides an online presence in order to stand out in the community and prospective families. It provides parents the ability to play an active role in their child's success with a dashboard full of personalized student data on a modern, mobile friendly website.

After the meeting, Frankie contacted several school districts in Texas that use their product. She sent the information to Leslie Francis for further review.
