

# Visit to Fiest Elementary School to Mark the Completion of All Campus Network Infrastructure

April 15, 2015, with the completion of Fiest elementary, marked the end of the 2014 Bond Technology Infrastructure network electronic upgrade at the campuses. A total of 87 campuses and 342 network closets had a complete network electronic refresh, requiring a total of 87,120 network access ports to be unpatched and re-patched.

This is a HERCULEAN accomplishment! The team is to be commended. Hear a few comments about the project [here](#).

David Deitscht (Presidio), Marty Luffman (Presidio), Dan Serwinek, Thomas Hollister, Joshua Bowman (Gigabit), and Clay Knight (Presidio)

Clay Knight (Presidio) and Frankie Jackson

The upgrade started in June of 2015, and every day since then, the CFISD Enterprise Communications Network team, under the leadership of Paula Ross, with Presidio and Gigabit Technologies, have spent their time planning, working after hours, and installing new equipment. A stable campus foundation is now in place so all other upgrades in the 2014 Bond can be completed!

Technology Infrastructure Network Electronics	Totals
Cisco 3850 Network Switches	1816
Cisco 4500 Network Routers	89
MDF / IDF Closets	342
MDF / IDF Uplinks	1040
Ports Patched	87120
<b>Total Items Upgraded</b>	<b>90407</b>
