

Network Infrastructure Upgrade Complete at Wilburn Elementary

Network

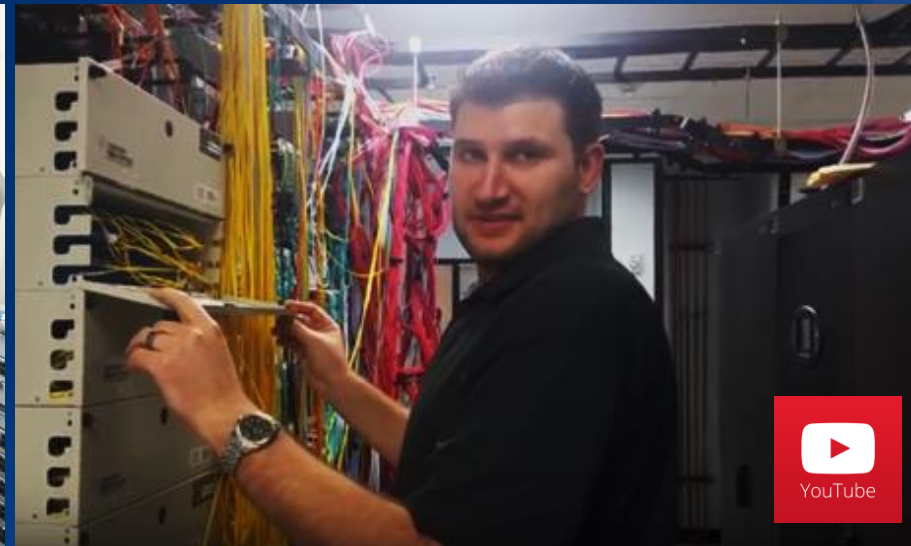

Bond 2

Frankie Jackson visited Wilburn elementary on Thursday, [February 18, 2016](#) to observe the network infrastructure upgrade. Shown in the below picture on the left is the team performing the upgrade. Check out [this video](#) to observe the process. Frankie then followed David Deitsch, the Presidio engineer assisting with the upgrade, back to Data Center 3, to observe the back end procedure which includes connecting the newly upgraded campus to the new core infrastructure (see [this video](#)).

The elementary school upgrades are progressing quickly, completing 4 campuses per week, one per day, Monday through Thursday. The team is to be commended for their hard work, persistence, and dedication.
