

# High Speed Cabling for Wireless and Voice Over IP (VoIP) Has Begun at the ISC

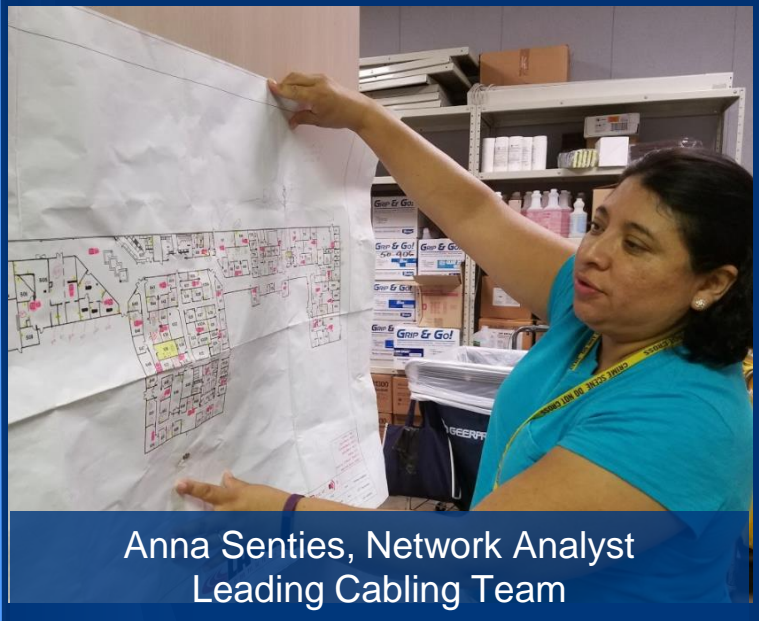

Bond 3.1

High speed cabling for wireless and Voice over IP (VoIP) has begun at the ISC. Frankie Jackson joined Anna Senties, the Network Analyst assigned to lead the cabling project for the ISC, on Friday, **May 19, 2017**. Anna is coordinating cabling work with Triumph, the district's VoIP cabling contractor. Triumph cabling technicians are working the 2:00 p.m. – 10:00 p.m. shift so they won't interrupt district staff.

After cabling is completed in each department, phones will be delivered to office desks however will not be available for use until late June. The scheduled date for ISC and ISC West to be online with the new VoIP telephone system is June 26, 2017. Great job Anna!
