

Technology Services 2014 Bond Technology Infrastructure Implementation Thanks iSphere's Larry Short for Project Management Support

Frankie Jackson, Paula Ross, and Larry Barrios thanked Larry Short for his 2014 Bond Technology Infrastructure project management support on Bond Goal 3.1, Upgrade Fiber and Cabling Connectivity.

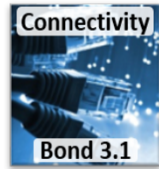

The team hosted a luncheon on **December 15, 2016** as a small token of their appreciation for his support. They also presented him a vendor commitment poster in a frame and staff signed the matte around the poster.

Larry was instrumental in managing our 2014 Bond Goal 3.1 cabling project.

Larry has left the team in great shape. The small amount of cabling needs left at the schools will now be addressed through iSupport tickets. Thank you Larry!

Paula Ross, Frankie Jackson, Larry Short (iSphere) and Larry Barrios

2014 Bond Sub Goal #3.1: Upgrade Fiber and Cabling Connectivity

This subgoal is the portion of the [Long Range Planning Committee's Recommendation #3](#) which includes upgrading network cabling, fiber optic connectivity, and network closets in the schools, service centers, hub connections, and data centers that will expand the access for faster connectivity
