

LANDesk Software Conversion from Novell ZENworks Continues

Frankie Jackson visited CyFalls High School on Tuesday, **June 21, 2016** to observe the LANDesk software converters from the Device Imaging and Integration (DII) team with Technology Service technicians.

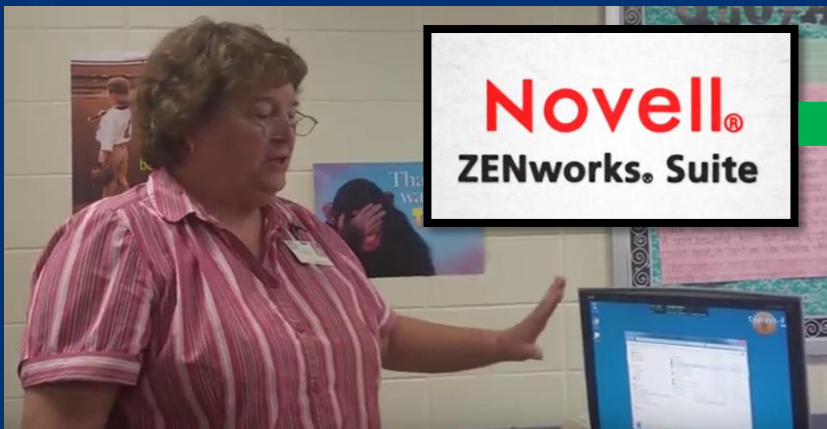

Austen Chang from DII is leading the conversion effort at the high schools with 10 technicians. The process is tedious due to every device needing to be turned on, sometimes even setup if maintenance is working in the building, and then reimaged with LANDesk. Click [here](#) to watch the process. The overall LANDesk conversion status is 34% complete.
