

Support to the Bus Buddy Program

Frankie Jackson participated in the Bus Buddy program to help bus drivers and students catch the bus safely at the start of school. This year she supported Farney elementary school. It was rewarding to see the bus drivers and students use the Zonar bus tracking software for checking students in and off the bus. Experiencing Bus Buddies is a way to feel the effects of our technology team's hard work in implementing world-class technology solutions for K-12.
