

District Improvement Planning Aligned with Technology Services

On **September 7, 2018**, Frankie Jackson met with Ashley Clayburn to discuss the new strategy for aligning technology to the District Improvement Plan (DIP).

Currently the Board monitoring system, the DIP goals, the Campus Improvement Plan (CIP) and our Technology Services goals are misaligned. There is now a push to align and streamline all district goals.

In this upcoming goal planning for 2018-2019, Technology Services will fall under the "other areas of improvement." The team will seek to structure new goals by goals, performance objectives, and strategies.
