

Technology Services Leadership and the Wireless Team Setup for Customer Support at the DLT Meeting

Technology Services setup a table at the Berry Center before and during the District Leadership Team (DLT) meeting on Thursday, **January 19, 2017**. The team is providing an extra level of technology support and is using the time when administrative district users walk into the door for the meeting to assist them with any technology issue, concern, or need. Specific emphasis is being placed on wireless and BYOT usage.

Sitting in the back of the Theater during the DLT meeting, most every administrator is connected wirelessly with their phone, tablet, or laptop. Only one wireless issue was reported and it was resolved.
