

Meeting at Food Warehouse to Prepare Network for Wireless and Phone Upgrades

On Thursday, **June 1, 2017**, Frankie met with Bob Rader and Anna Senties at the Food Warehouse. Anna is working to get her assigned service center sites ready for wireless and phone upgrades.

The team is preparing to move switches, Uninterrupted Power Supplies (UPS), and other equipment around to make room on the network racks for Voice over IP (VoIP) phone upgrades and new wireless implementation.

Bob Rader is working with the Technology Services department this summer. He is the campus technician at CyPark high school. Our team is fortunate to have him work with our team as we prepare for the service center wireless and VoIP upgrades.

Bob Rader and Anna Senties

Old Centrix telephone wiring that will need to be removed after the new telephone system (VoIP) implementation

**Thank you team!
Great job.**
