

PS Lightwave Contract Review and Future Planning for Enterprise Network Routing and Security

The Network Infrastructure and Communications (NIC) team met with VMWare, Layer3 Communications, and Education Partners Solutions (EPS) on **May 9, 2018** to discuss the future planning for enterprise network routing and security. Due to the complexity of the network, a great amount of detail design considerations are involved. Additionally with the new contracts that are being finalized with ICTX, Cogent, and PS Lightwave, risk is involved in making sure the district is covered long-term. Hopefully contracts from PS Lightwave will be ready to finalize by Tuesday, May 15, 2018.

Frankie Jackson spent a time reviewing contracts, asking detailed design questions and cross referencing the new contracts back to the cost and requirements set forth in the following Request for Proposals (RFPs.)

Layer3 Communications, EPS, VMWare and Cy-Fair staff from the Network Infrastructure and Communications (NIC) team
