

Transformational Technologies Considered for the Future

On **April 12, 2017** Frankie Jackson met with the Eric Murrell, Huawei’s Vice President at Huawei Enterprise for eLTE. As a means to bring “constant connectivity” to students outside of school, Internet access is required in the homes. Huawei is a company that provides this type of connectivity. Huawei is proposing a pilot. Once received, the proposal will be taken to executive management for review.

Rightsized Switching with **Low Total Cost of Ownership**

Multi-Gig Access

with SmartRate technology

HP 5400R

HP Smart Rate multi-gigabit ports and POE+ for high-speed connectivity and bandwidth to support next wave 802.11ac devices

Lifetime warrantee – no on going maintenance

Leverage existing 5400 chassis w/ new I/O modules to save even more money

Also on **April 12, 2017** Frankie Jackson met with Richard Heffelfinger, Olin Olson, and Paula Ross, to discuss the possibility of moving to a complete wireless campus in future construction and renovation projects. Some of the benefits include:

- Wireless is preferred
- Cost savings
- Greater efficiency

They agreed to consider a pure wireless approach in the near future.
