Overview

- Using information from the **CoSN IT Leadership Survey**, we pulled a reference list of trends together
- Our panel of experts then ranked the trends based on what they think are most important going into 2019

Trend #1

Finding new ways to protect student data

Trend #2

Significance of interoperability in gaining better insight into student performance

Trend #3

Becoming learner centric and preparing students with 21st-century skills

Trend #4

**Helping teachers understand the power
behind the technology**

Trend #5

Implementing and sustaining initiatives
