

Meeting at Telge Transportation to Prepare Network for Wireless and Phone Upgrades

On Wednesday, **May 31, 2017**, Frankie met with Elizabeth Montes at Telge Transportation. Elizabeth is working to get her assigned service center sites ready for wireless and phone upgrades.

The team is moving switches, Uninterrupted Power Supplies (UPS), and other equipment around to make room on the network racks for Voice over IP (VoIP) phone upgrades and new wireless implementation.

Elizabeth being proactive, has Jose Mendez (campus technician) working with her to help move equipment around. She also has MCA prepared to make cabling and switching rack moves if needed.

Thank you team!
Great job.

Elizabeth Montes, Jose Mendez, Baldo (MCA), Frankie Jackson
