

Special Thank Yous to Technology Services Staff

I appreciate the overwhelming amount of recognition this week. Everyone on the team really made me feel special. With **Katie Hernandez, Jennifer Miller, Jay Johnson, John Crumbley, Larry Barrios** and **Paula Ross** starting with a breakfast in my office on Monday morning with decorations and balloons, to a huge sheet cake with my picture on it, to a surprise meeting at facilities and construction with another cake! You guys went over and beyond to make this week really nice for me. I can't tell you how much it meant to me. **Thank you! - Frankie**

I also thank **Greg Rhodes** for working through a complex Internet content filtering blocking issue with youtube. Mr. Maxwell, a science teacher from Thornton middle school, as well as other teachers having issues with Moodle when embedding youtube videos, were unable to use their teacher webpages with google sites, using youtube videos. This was causing great frustration. **Greg** stuck with the issue and found a resolution by working with Fortinet and experimenting with various blocking options. Needless to say, the teachers and Instructional Technology department were thrilled – **Thank you Greg!**

Katie Hernandez worked so hard to update and balance the 2014 Bond Technology Infrastructure budget. She did this for me so I would have it for the DLT meeting on Thursday. Additionally she worked with Facilities and Construction project managers to get the most recent status for Bond Goal 3.2 (A/C Upgrades). Her work continues to be so outstanding and consistent. I appreciate her more and more every day – if that is even possible. Thank you Katie for all that you do for me. – Frankie Jackson
