

# Technology Ran Smoothly During the RRR Conference Due to Great Infrastructure and Great Support

Many of the sessions at the RRR conference depended on extensive use of technology. Shown in the picture to the right is a lab filled with participants, all using wireless laptops, in a Promethean Modern Classroom session. The wireless connectivity was flawless!

With Robert Hernandez providing onsite support, addressing any login or laptop assistance, the conference was a complete success.

This is a great example of having great technology infrastructure and great support that results in great conference sessions!

Thank you Robert Hernandez and the rest of Technology Services that have ensured technology infrastructure upgrades were completed at the Berry Center this year.

Robert Hernandez, Technology Service Technician
