

# Analysis and Cost Estimations for Senate Bill 507: Cameras in Special Education Classrooms

Frankie Jackson spent a significant amount of time analyzing and preparing cost estimates to determine a strategy for fulfilling the requirements of Senate Bill 507, approved by the 2015 Texas legislative session. Texas SB 507, mandates cameras in special education classrooms, was signed into law on June 19, 2015 and takes effect at the beginning of the 2015–2016 school year. The following is a summary of the work completed this week.

- 1) Worked with Dillon Brady, Assistant Superintendent of Facilities and Construction, to prepared a detailed analysis, compiling the total number of special education classrooms that will need cameras. He received inputs from campuses then totaled by worksheet, each campus' needs. He created a summary worksheet with campus totals. Using the campus summary totals and LENSEC's cost proposal, he prepared a preliminary cost estimated for our district.
- 2) Took his cost estimate and added additional technical considerations that affect the overall cost.
- 3) Prepared a consolidated spreadsheet by campus, so other Texas districts could come up with some cost averages. collected. I also added Austin ISD's information, based on the letter Teresa sent last week.
- 4) Reported a summary to CFISD associate superintendents.

On Tuesday, February 9, 2016, Frankie will be attending a meeting in Austin, hosted by the Texas Education Agency, to participate in a discussion about SB 507.
