

Wireless Coming to Berry Center Parking Lots, Stadium and Arena, as well as Pridgeon Stadium

Frankie Jackson worked with Paula Ross and Karen Smith (Business Services) to secure funding for additional wireless capability at the Berry Center and Pridgeon stadium. The following table shows the breakdown of where increased wireless access will be provided. Layer3, our enterprise level wireless partner, is working to deliver equipment by June 30, 2016. We are thrilled about this project and the innovations that will be available.

Wireless Access at Berry Center Phase II and Pridgeon Stadiums

Berry Center Parking Lot Coverage Around the Berry Center

Berry Center Aruba ClearPass Solution for Security

Berry Center Press Box/4 Concession Areas/Ticket booths Aruba Networks Solution

Berry Center Arena High Density Solution

- Antennas on the catwalk covering 1200 seats on the floor - supporting 9200 users

Berry Center Stadium

Pridgeon Stadium

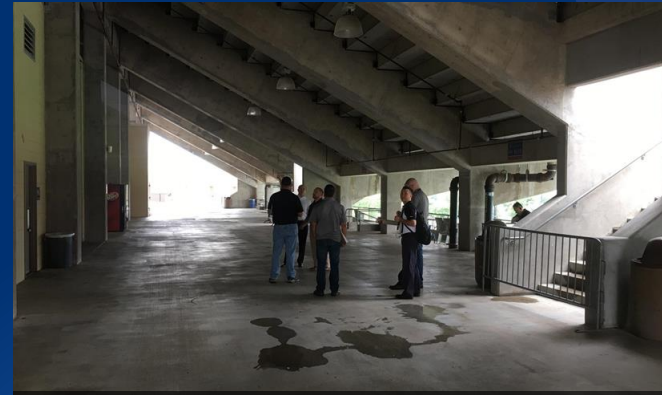

Included in Project:

Berry Center facility is highly complex. It will require 4 complete network electronic closets overhauls, including cabling and fiber

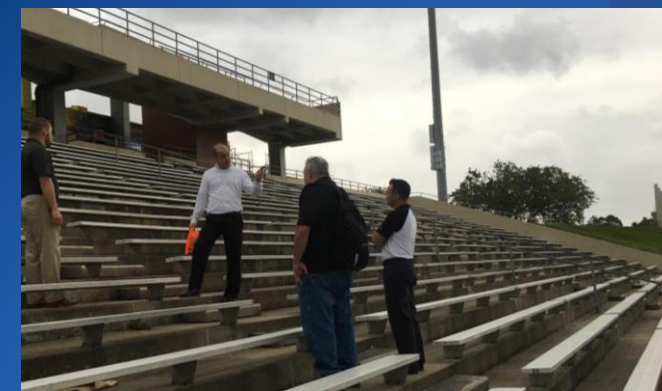

Both stadiums will require (60)ft Exterior Boomlifts and (28) foot Scissor lifts

Includes tuning of the wireless networks after implementation, testing, and use during events

Solutions are turnkey, including Project Management and post implementation support and maintenance for 5 years
