

# Trusted Learning Environment (TLE) Application for the Seal of Approval: Second Submission

In May 2018, the CFISD Cyber Security Services team submitted an application for the Consortium of School Networking (CoSN) Trusted Learning Environment (TLE) seal of approval. Though the results from the application were very good, areas were cited that needed to be improved. The team worked tirelessly between June and October 2018 to strengthen our cybersecurity practices and processes. The team submitted the updates and improvements in a 2<sup>nd</sup> submission on **October 26, 2018**. **Congratulations team!**

The updates in the 2<sup>nd</sup> submission are centered around the following areas:

- Expanding the information on the Cybersecurity website.
- Increasing policy development around our Data Use Policies, Data Retention Policies, Data Security Policies, and Software and Application Vetting procedures.
- Sharing additional information around FERPA, COPPA, CIPA, and PPRA with teachers, administrators, and parents.
- Providing additional training sessions for staff and parents.
