

# Live Demonstration of PowerSchool's Unified Classroom

Frankie Jackson participated in a live demonstration of PowerSchool's Unified Classroom on **December 1, 2017**. The product was thought to be a possible alternative to SchoolNet's iXplore's teacher webpage and learning management system. As it turned out, the product is not scalable to a district the size of CyFair ISD. Additionally, parts of the product are still in development and they have few if any references. The demonstration was a disappointment.

District representatives included Curriculum and Instruction, Technology Services, and Business Marketing. Representatives from PowerSchool took the action to deliver a product road map and a list of districts they are working with to develop the product.

## THE UNIFIED CLASSROOM
