

Wireless Design Meeting at Pridgeon Stadium

Frankie Jackson met with the Enterprise Communication Networks (ECN) team, Facilities and Construction, and Layer3 on **November 15, 2017** to access the wireless design at Pridgeon Stadium. The teams discussed potential costs, funding sources, and the need to nail down the design and estimate the total cost. Layer3 has the action to prepare the estimate.

The following are some great pictures showing the teamwork amongst the teams.
