

# DEVICE IMAGING AND INTEGRATION

## Palo Alto Networks TRAPS Demo

Anthony, Derly, Nancy, Austen, Lillie with James

The **DII Team**, along with **James Costello** (Cyber Security), met at Layer 3 for a Palo Alto Network TRAPS demo. This demo is referred to as the Ultimate Test Drive for Advanced Endpoint Protection and involved a workshop where members infected virtual computers in order to see the product in action. The TRAPS Console was used to alter rules so that each infection was treated differently. It was a very informative demo.

***ULTIMATE  
TEST DRIVE:***

***Advanced Endpoint Protection***

Next Steps:

1. Meet with Palo Alto Networks to discuss a POC.
2. Start a POC with TRAPS Advanced Endpoint Protection.
3. Review the results of the POC.
