

# DII Testing at Cook Middle School

Network equipment swaps continue at the Middle Schools. DII was on site Monday November 9<sup>th</sup> at Cook MS to test the switches there. **Lillie Swearingen** worked with **Anna Senties** to test the closets at Cook. **Lillie** and **Anna** made sure the network was up and running before the school was up ready for the day!

One of the benefits (beside better connectivity) is that the closets get cleaned up. Compare the picture above with the equipment in left picture. You will notice that it looks cleaner. The cables are better managed and systems look more professional. Keep up the good work team!

**TEAMWORK**

# DII Testing Closets at Watkins MS

Closet at Watkins

Nancy at Watkins

Closet at Watkins

**Nancy Grella** was on-site at Watkins Middle School on Monday November 9th at 6 AM. She tested the network gear before the school opened for teachers and students. DII will continue to be on-site to make sure that the campus is up and running. **Nancy** notifies ECN if there are issues with the equipment.

# DII working with Prime Systems

**WORK IN  
PROGRESS**

DII is working with Prime Systems to image Lenovo ThinkPad2s for Special Ed. Josh Zhang and Nancy Grella and Josh Zhang worked with Prime Systems out at Danish Elementary to learn the process. Nancy and Josh met with Jennifer Miller and Scottie Stevens to develop a schedule for the High Schools. This would allow Campus Techs to know when Prime would be on site to image their tablets. Now that is **TEAMWORK!**

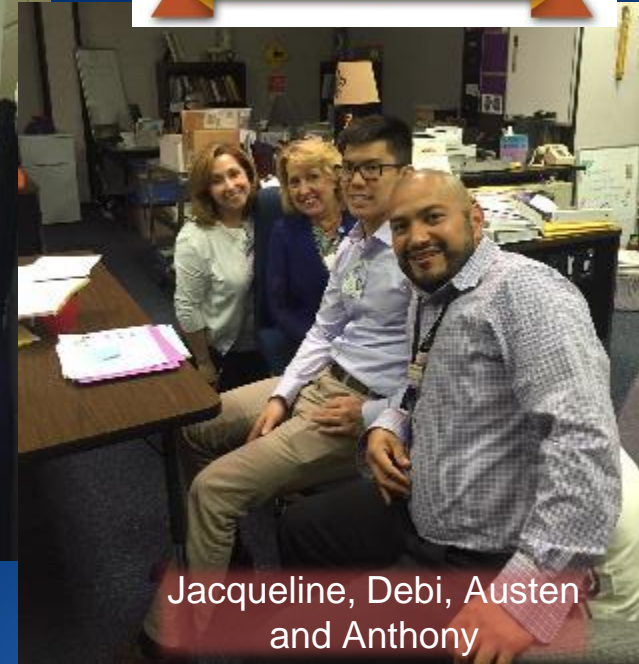

# Read 180 issues worked on!

Anthony, Louis, and Rock

Charmion and Anthony

Jacqueline, Debi, Austen and Anthony

Anthony Melton and Austen Chang, DII team members, worked with Charmion Mohning (Read180 Coordinator) to solve an issue at Jersey Village High School.

Anthony Melton and Austen Chang, also met with Jacqueline Guerrero and Debi Cowie (Read180 secondary coaches) to gather data. They were able to help Jersey Village with their Read 180 issue.
