

DII checking Closets

Lillie at Campbell

Lillie was out at Campbell MS and Nancy Grella was out at Thornton MS on November 16th. They were checking the last of the Middle Schools on their network gear update.

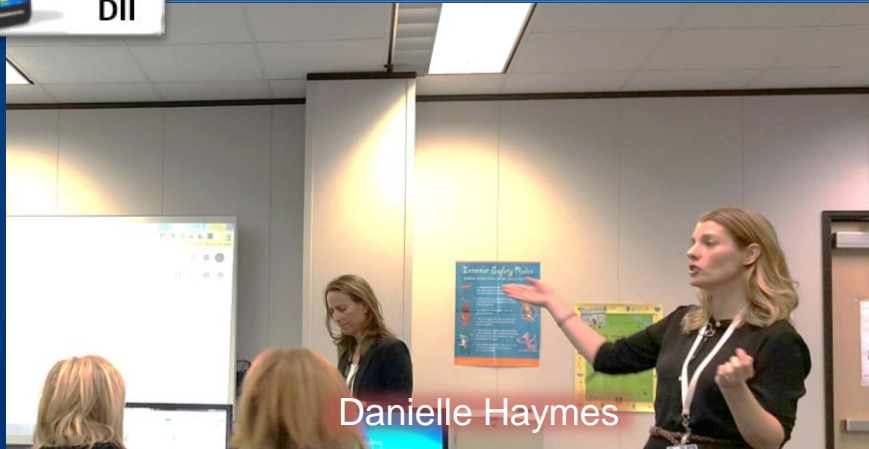

Closets at Thornton

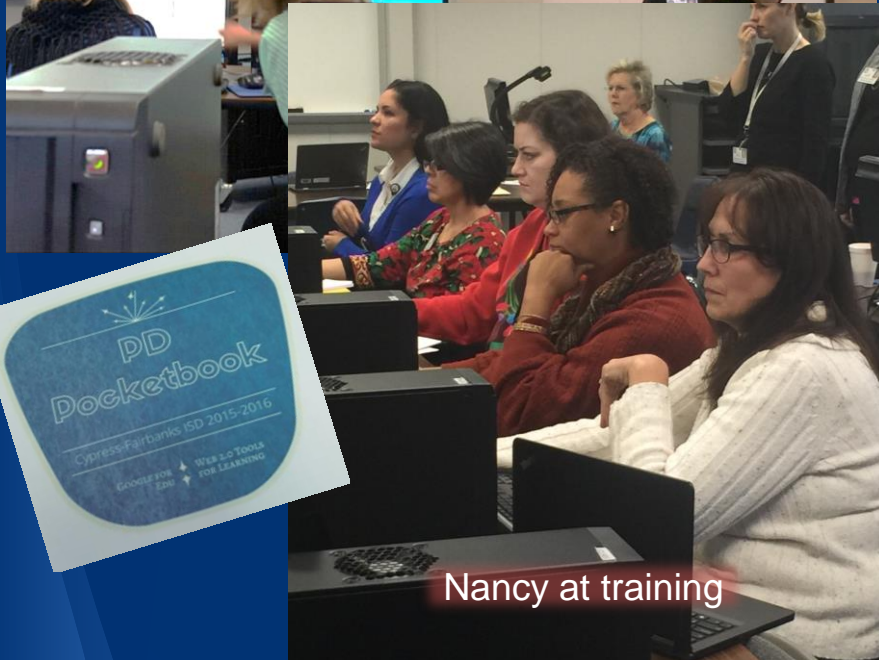

DII attending Training

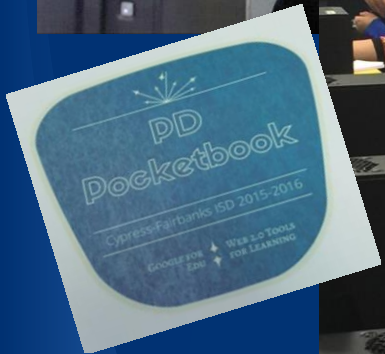

Danielle Haymes

DII, team members Michelle Campos and Nancy Grella attending a Google District class. This class was led by Danielle Haymes. Other district personal attended the class put on by the Curriculum Technology Department.

The intent of the class was for district employees to learn how to use Google Drive. They were shown the benefits and given a better understanding of Google Drive. The class also covered Google Docs and how that would be used in the work place.

Training Continues

Allby from Apple

Michelle and Nancy

Valarie (AirWatch) and Dina (Apple)

Michelle Campos and Nancy Grella also attended an Apple Seminar this past week. This seminar was for school districts from all over the Houston Area and put by Apple. Apple wanted to communicate to the school districts the changes coming from Apple. These changes would enable school districts to better control and use iPads in a one to many environment. This means that one iPad can be shared with multiple users. This is a change from the Apple model. Apple also wanted the schools to know that Apple is listening to the K12 market.

Tablet Updates

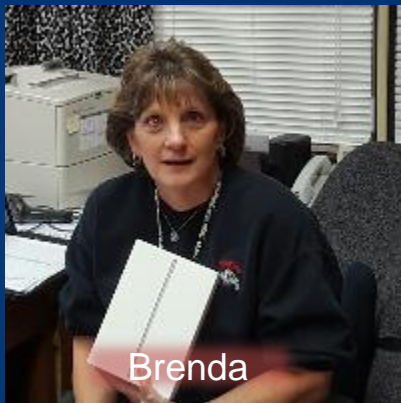

Nancy, Scottie, Hector and Josh

DII members Josh Zhang and Nancy Grella along with Scottie Stevens representative from CCC met with Hector Gonzales from Prime Systems to discuss the progress of the Lenovo ThinkPad2 imaging process was going. They also discussed the Middle school schedule. From the feedback from Prime, it was determined that progress was being made and was on schedule.

Austen

Brenda

Nancy Grella is still updating iPads for the campuses. She recently took care of the iPads for Watkins. Brenda Willey took the iPads and got them back into the hands of staff and students. Having Nancy updates the iPads allows them to better function for the end-user.
