

Displays to Communicate with Students in Real-Time

Yokel display monitors update:

Derly Buentello and **Daniel Serwinek** continue to work with the vendor. The new monitors are hooked up to the network. The team works with the administration and Service Techs to make sure they understand the setup. The monitors will broadcast school related information as well as paid advertisement. Every high school should have some of these monitors hooked up by October. Here is the list of completed schools:

- | | |
|-------------|---------------|
| Cy-Fair HS | Cy-Ranch HS |
| Windfern HS | Cy-Falls HS |
| Cy-Lakes HS | Cy-Woods |
| Cy-Ridge | Langham Creek |
| Cy-Springs | Cy-Creek |

This week the team will spend time and finishing up the and working with the issues at each of the campuses. :

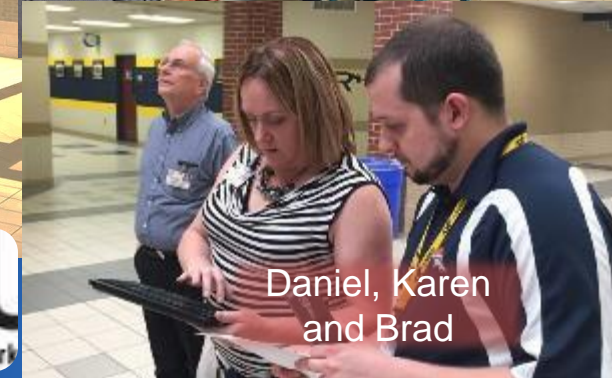

Louis Castro

Daniel, Karen and Brad

Displays to Communicate with Students in Real-Time

The DII team, which was made up of **Lillie Swearingin**, **Josh Zhang** and **Austen Chang** worked with Microsoft Engineer Justin Chalfant to start the Microsoft System Center Configuration Manager (SSCM) proof of concept (POC). This is ongoing project to replace Novell's ZenWorks. The team is evaluating SSCM to see if it will meet the district's need in managing the over 70,000 devices that are out at the campuses. There are certain requirements that the team is looking for in a product and will use the POC to test out features and test the system.

Austen and Shannon

Austen Chang has been out at Woodard Elementary this past week. He has been assigned to report out to Woodard and address different technology issues. He is working with campus Administration **Susan Brenz** and **Shannon Gillpatrick**. Opening a new school is exciting and frustrating at the same time and sometimes things get overlooked. This is where **Austen** comes, he will assisting with the technology needs and help solve issues as they arise.

Service with a Smile

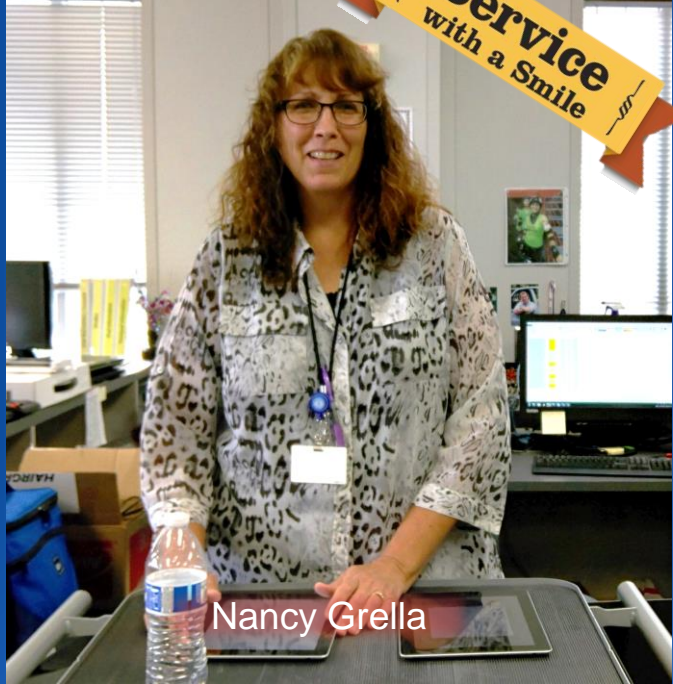

Anthony Melton

Anthony Melton is on the phone talking to customers. He is remote controlling customer machines and troubleshooting. **Anthony** is able to solve a wide range of issues from his desk and having customer on the phone.

Service with a Smile

Nancy Grella

Nancy Grella has been working on prepping iPads so that they will be able to use the new CFISD_CP wireless and will display the CFISD app store. Nancy is still all smiles even though to date she has helped upgrade and has touched 1151 iPads from the COMPED purchase and has 52 more to do. Way to go Nancy!!
