ECN Operational Support

at the Core, North & South Side of Hwy 290, and Telecommunications -

Highlighted below are the main areas of support provided last week:

Oscar Villar pictured with the bad Cisco module

Technology Services has a core Cisco 6509-2 router that has been experiencing problems. In an attempt to correct the issue, Tuesday evening, June 23, 2015, **Oscar Villar** replaced the second module in the Cisco router. The second module has consistently gone offline, therefore causing connectivity issues for the sites connected to that module. **Oscar** will continue to monitor the Cisco 6509-2 router for issues.

Oscar Villar also attended a meeting with Maintenance and Operations employees Dave Tooker, Delroy Zeis, Adam Gray and ClimaTech. ClimaTech will be installing 572 new networked thermostat's in the CFISD portable buildings this summer. ECN will provide DHCP reservations for each thermostat.

ECN Operational Support

at the Core, North & South Side of Hwy 290, and Telecommunications -

Highlighted below are the main areas of support provided last week:

During the past week while Thomas Hollister and Anna Senties are focused on bond related campus conversions, **Elizabeth Montes** is primarily taking care of operational issues and summer school related issues. **Elizabeth** visited the following schools due to power related issues:

- Jersey Village HS
- Swenke ES
- Bang ES
- ALC/ABC
- Hamilton MS
- Ag Show Barn
- Horne ES
