

Thank you Technology Services Staff!

Kim Bowlin has tirelessly worked on the virtualization RFP and quote to replace Novell Storage Manager. She has been a huge help to me. Greg Rhodes

I appreciate Jennifer Miller's creativity in coming up with a new idea for technicians called "RoloTechs" - a playbook for technicians - kind of like a Rolodex.... She consistently is excited about our work and she tries to bring new creative ways to the daily task of providing service. Thank you. Frankie Jackson

I appreciate Jay Johnson working closely with me to analyze the 2014 Bond Infrastructure Technology budgets in Goal 5.2 (Administrative Technology) and 5.3 (Printers) to prepare a five year plan and budget analysis. This information was valuable and needed to support the LANDesk recommendation that went to the Board on January 19th, 2016. Frankie Jackson

Thank you Technology Services Staff!

Since December 2015, Kim Bowlin has worked closely with the Network Management and Operations (NMO) team, the Enterprise Communications Network (ECN) team, and the Device Imaging and Integration team - to work through the processes of preparing RFPs, scoring bid proposals, arranging for vendor meetings, coordinating with technical consultants, and ultimately working with Frankie Jackson to prepare for the January and February 2016 board meeting. Kim prepared the bid tab analysis, the board recommendation, and explanatory notes. Then on top of all of this, it is e-rate funding request time. With that, we've had to turn in and prepare RFPs and e-rate 470s to request funding reimbursements for new schools.

Through all of this, Kim's shown that she is highly-skilled in working through these complex processes. She has handled pressure so well. She has methodically worked through the work in an orderly way - very patiently solving problems and issues as they have come up. She's taken one day at a time as we progressed through each step of the process. I can't say in words how grateful I am for her support. Thank you Kim for representing our core organizational value of being high-skilled so well. Frankie

Thank you Technology Services Staff!

John Crumbley,
Thank you for supporting me in a meeting with Chairita Franklin as we worked through a plan to provide Information Services and Applications support to the Human Resources department in 2016.
Frankie Jackson

Larry Barrios,
Thank you for visiting campuses and helping the Enterprise Communication Network team communicate our upgrading plans for the upcoming week. Larry took the time to visit each principal to let them know our upgrade strategy at their respective campus. Sometimes the personal touch of visiting the school is the best way to build relationships. Thank you Larry. Frankie Jackson

Thank you Technology Services Staff!

I appreciate Paula Ross's attention to detail as we get started in 2016 working to balance MAJOR work that needs to be done: wireless dense deployment, elementary school network upgrades, 8 teams of cabling, cutover to DataCenter 4, completing the renovations to Data Center 3, bringing on new staff on her team..... all with a great smile, lots of humor, and balanced professionalism. My words can't communicate how proud I am for her team. THANK YOU FOR ALL THAT YOU DO. Frankie Jackson

I loved Greg Rhode's video to support www.myintent.org. Greg is so creative in communicating his message. I appreciate the extra level of leadership that he brings to our team. He always spins his message with a twist and takes my thoughts to a higher level. Thank you Greg. Frankie Jackson

Thank you Technology Services Staff!

Frankie appreciates Katie Hernandez for her hard work and persistence in keeping our 2014 Bond Technology Infrastructure in balance. Specifically she worked tirelessly to the past couple of weeks to transfer borrowed funds from the 2014 Bond Instructional Technology budgets (for Woodard elementary and US History laptop purchases). The process is complex and tedious. Katie worked with the Finance Department, Jay Johnson's team, and Becky and her team - all in an effort to keep our records straight and make sure budgets are in balance. I can't write in words how impressed I am with her attention to detail and her accounting skills. THANK YOU for all you do to support me and the entire technology program at CFISD.

The ECN Team is extremely fortunate to have the support of Glen Carpenter. No task is too small for Glen. Thank you for always being willing to jump in and help!! - Paula Ross

Thank you Technology Services Staff!

Thank you Kimberly Bowlin for your assistance with the Virtualization RFP!! We are not done, yet - but we could not have made it this far without your help!!
- Paula Ross

Thanks to John Crumbley who always lends an ear in a time of need!!
- Paula Ross

Thanks to Mike Raspet for once again giving up his holiday to work on DataCenter 3. Mike worked over Thanksgiving, he worked over Christmas, and now he worked on MLK Day! Thank you for your willingness to do what it takes to get the job done!! -Paula Ross

It appears that we have been double billed for fiber services and thanks to Samara Rivera-Rangel's organized processes, we are requesting research of the charges and a refund from the vendor. Samara caught the error when creating purchase orders for payment. Thank you, Samara!
