

DEVICE IMAGING AND INTEGRATION DII & Technician Zoom Meeting

Derly Buentello, Anthony Melton, and Larry Barrios hosted a Zoom meeting with multiple Technicians. They covered campus testing support, campus network support, Microsoft Windows 10 training, and then had an open forum for questions.

Feedback from the Zoom meeting was highly positive and these meetings will continue in the future.

Take Aways:

1. Choose a location for the next Zoom meeting with less background noise.
2. When inviting high school Technicians, include both Technicians from the campus.
3. Confirm training content is provided to Technicians prior to the training session.
4. Provide a computer with a built-in camera for all Technicians.
