

Trusted Learning Environment Progress

Monday, March 5, 2018 through Friday, March 9, 2018

This week was spent trying hard to work towards our TLE certification. A huge part of the effort was spent gathering outstanding cyber security resources to be shared with our teachers, students, and parents!

ONLINE CYBERSECURITY ADVICE
for all digital citizens

The internet is a shared resource, and securing it is Our Shared Global Responsibility.

LOCK DOWN YOUR LOGIN
Your usernames and passwords are not enough to protect key accounts like email, banking and social media. Strengthen online accounts and use strong authentication tools – like biometrics, security keys or a unique, one-time code through an app on your mobile device – whenever offered.

KEEP A CLEAN MACHINE
Keep all software on internet-connected devices – including personal computers, smartphones and tablets – current to reduce risk of infection from ransomware and malware.

WHEN IN DOUBT, THROW IT OUT
Links in email, tweets, posts and online advertising are often how cybercriminals try to compromise your information. If it looks suspicious, even if you know the source, it's best to delete or, if appropriate, mark it as junk.

BACK IT UP
Protect your valuable work, music, photos and other digital information by making an electronic copy and storing it safely. If you have a copy of your data and your device falls victim to ransomware or other cyber threats, you will be able to restore the data from a backup.

OWN YOUR ONLINE PRESENCE
Set the privacy and security settings on websites to your comfort level for information sharing. It is OK to limit how and with whom you share information.

SHARE WITH CARE
Think before posting about yourself and others online. Consider what a post reveals, who might see it and how it might affect you or others.

PERSONAL INFORMATION IS LIKE MONEY. VALUE IT. PROTECT IT.
Information about you, such as purchase history or location, has value – just like money. Be thoughtful about who gets that information and how it is collected by apps, websites and all connected devices.

Firewall Security and Updates

On **Tuesday, March 6, 2018**, we met with Layer 3, **Paula Ross**, and **David Deitsch** to discuss the how to better protect our networks, utilizing our next generation firewalls.

Progress and Meetings

Wednesday, March 7th, 2018 through Friday March 9th, 2018 included several necessary meetings as we work to update our policies, procedures, and work towards obtaining our TLE certification. These included the following:

- Disaster Recovery meeting with **Greg Rhodes** and his team
- TLE Presentation with the secondary coordinators
- Cyber security meeting with **Jennifer Miller, Frankie Jackson, and Eric Pina**
- Disaster recovery with **Jennifer Miller, Paula Ross, and David Deitsch**

The week also included working with employees to block malicious emails from affecting the network. It was definitely a busy and fruitful week!
