

DEVICE IMAGING AND INTEGRATION MBAM Meeting

As a result of this meeting the following were takeaways:

1. Unencrypt all devices in current MBAM deployment.
2. Encrypt Psych Services laptops upon receipt with keys stored in SQL Database.
3. Test MBAM deployment in new AD environment.

Josh, Larry, and Derly

Larry Barrios, Derly Buentello, and Josh Zhang (NMO) met to discuss MBAM deployment in the new AD environment. Covered were:

- 1) Encryption key recovery for laptops that is currently available and encryption key recovery for removable storage that will be available in the new AD environment
- 2) Encryption key storage will move from Active Directory to an SQL database for MBAM
- 3) CFISD employee encryption candidates and computers will be targeted by MBAM through AD
