

Acquisition Team Developing Punch-Out Improvements

In an effort to provide better customer service, the Acquisitions team met with Prime systems and Lenovo to review the Punch-Out order process. The team is working on automating delivery tickets. Currently, the district is hand creating every laptop and desktop delivery ticket. Prime Systems, one of the district's valued business partners, is working on automating this process for us. Information will be pulled from the Punch-out system to automatically generate the delivery ticket.

Acquisition Team Works With Assets Team To Tracking Orders

Have you ever placed an order and wondered

– Where's my stuff?

www.cfid-technologyservices.net/po-listing.html

Geoff Brown (pictured right) has been instrumental in helping us create an on-line database where our customers can view their order status. Click on the link above to see our progress. Thanks Geoff!!!

Organizational Announcements

Technology Services New Staff

Start Date: September 1, 2016

The Technology Service Center is pleased to announce that **Dencio Cabitac** has officially accepted the position of Service Technician II. His official start date with the Technology Service Center was **September 1, 2016**.

After working at HP for 26 years, Dencio began working for CFISD as a Technology Service Technician IV at Cypress Lakes High School in **August of 2015**.

Dencio is happily married with three children: a son who is a senior at Cy Ranch, a son about to graduate in the Nursing program at Texas A&M, and a daughter in the Masters of Psychology program at the University of Houston. When not working one of two jobs in order to pay for all that education (!), Dencio spends his spare time running.

Welcome to the team, Dencio, and thank you for calling the Technology Service Center your new home!

Reflections

Acquisition, Assets, and Sustainability

It is already October and it looks like our teams are not slowing down. We keep getting request for new equipment. We keep getting request to remove old equipment. We keep getting request to fix broken equipment. I do not know when we will get a chance to take a break. I guess it is good to stay busy and to know that our teams are needed. The Holiday season will be here soon and I hope our teams will get some time to enjoy the Holidays. But for now they will stay busy. - **Jay Johnson**
