Essential Procurement Skills

- Tactical Purchasing
- Analysis & Spreadsheets
- Contract Law
- Negotiation
- Purchasing Best Practices
- Sourcing

SPSM-BOK® Mastery Model

This morning, **Kim Bowlin** passed her examination for Senior Professional in Supply Management Level 2 (SPSM2). The SPSM2 is an advanced global procurement management certification. In the SPSM2® Program, an individual learns how to manage a purchasing department, how to manage procurement projects, and how to buy internationally. Kim already holds the Senior Professional in Supply Management certification. The SPSM2® Certification builds on the skills and knowledge that Kim already acquired while earning the SPSM® Certification and adds training in areas that are becoming more mission critical in the purchasing field: international procurement and managerial skills.
